

## 48 volt lithium battery for ebike

For context, a Prius battery lasts 250,000 miles or more, and the Tesla Model S has an eight-year, 100,000-mile battery warranty. However, taking proper care of your e-bike battery will last four to five years instead of one or two. Maximizing Your E-Bike Battery. Most e-bikes run on either a 36-volt or 48-volt drive system.

Like all 48-volt electric bike batteries, it also features a 42V 2A charger. You can recharge the battery within 5-6 hours by using the charger. Besides, this eBike battery has a 5V 1A USB port to power up mobile phones safely. ... If you charge the 48V ebike lithium battery for the first time, it will take up to 8-10 hours. On the other hand ...

But if not, it would be better to avoid these batteries. Weight for weight, nickel-cadmium (NiCd) batteries have more capacity than lead-acid batteries, and capacity is an important consideration on an electric bike. However, nickel-cadmium is expensive and cadmium is a nasty pollutant and hard to recycle.
