

A college that teaches a course in renewable energy

MITEI Education offers energy-related massive open online courses (MOOCs) on the MITx platform. Based on interdisciplinary, graduate level energy subjects taught at MIT, learners gain a broad perspective of future energy systems, access cutting-edge research, and gain skills and tools necessary to expedite the worldwide transition to clean energy.

Examines the basics of energy technologies and energy delivery systems. Covers both conventional energy sources (oil and gas, coal, nuclear and hydroelectric) and renewable/sustainable energy technologies (wind, solar, biomass, geothermal and end-use efficiency). Investigates individual technologies as well as integration of multiple ...

MITEI Education offers programs and opportunities that prepare future energy innovators, researchers, and policy makers to confront the urgent global challenges of developing zero- and low-carbon energy solutions to address climate change and expand energy access. We serve undergraduate, graduate, and postdoctoral scholars at MIT and around the ...

The Master's of Science in Climate, Energy, and Environmental Sustainability can be earned completely online, or you can take courses onsite at the Johns Hopkins Applied Physics Lab in Laurel, Maryland.

Learn how to use existing and known technologies to harness, store, and transmit energy from wind, water, and solar sources to ensure reliable electricity worldwide, and at the same time eliminate air pollution and safely secure energy supplies for all.

There are plenty of options available for people looking to start a career in renewable energy or expand their current professional goals to include sustainable energy. Regardless of where you fall on the spectrum, these 10 colleges are the best place to start researching which program will meet your education needs and career goals.

Designed for professionals in the energy industry, including administrators, engineers, business entrepreneurs, and others impacted by new policies and practices relating to renewable energy, the online Graduate Certificate in Renewable Energy (GREC) covers energy technologies, energy markets and business, and energy policy.

Learn how to make wise investments in energy companies. Self-paced, online energy courses will give you the insights and skills needed to successfully address problems related to energy and sustainability. With eight courses to choose from, you can design your program to meet your specific needs and goals.
