Structures such as hospitals, universities and industrial facilities use high- and medium-pressure steam containing valuable energy that can be recovered. Avoid venting this steam into the atmosphere where its heat is wasted. Instead, use the recovered heat to preheat domestic hot water or returned hot water from the building's heating system.

Energy-saving services for your business. We offer energy-related products and services specifically designed for commercial and industrial customers, because we know that efficiency is a top priority when it comes to saving money.

HVAC stands for Heating, Ventilation, and Air Conditioning. It refers to the systems and technologies that regulate and maintain indoor environmental comfort. These systems provide thermal comfort and acceptable

Insulate the storage tank, supply piping, and recirculate piping; observe water temperature guidelines; encourage the tenants to conserve. In addition, an analysis of a building's hot water demand pattern sometimes indicates that placing multiple water heaters close to usage points is more economical than using one central tank.

When the water heater cycles, the elements will power down and restart in time for you to maintain plenty of hot water in the tank. By managing energy use when demand is high (those periods when our system is experiencing high energy consumption), our supplier can reduce the demand for energy when the costs are the highest.

Electric or natural gas heat pump water heaters; Central air conditioners; Natural gas water heaters; The above list is not all-inclusive, but we have identified the types of improvements likely to be most relevant to Alabama homeowners. You can claim the credit by filing Form 5695, Residential Energy Credits, with your tax return.

Please note: All rate plans include a monthly base charge. Other types of charges may be used in different rate plans and are noted accordingly in the chart. It's important to note that total costs are spread over the various types of charges within different rate plans; therefore, fewer types of charges in a plan does not always mean lower bills.

Thank you for applying for a water heater rebate. You will be notified via email within 3 business days if your application is approved. If you do not receive a confirmation email within 24 hours of submitting this application, you may have entered your email address incorrectly.
