

Alberta Renewable Energy Projects . Who regulates the renewable energy industry? The Alberta Utilities Commission (AUC) is the regulator for all electricity generators, including the wind and solar industries. The AUC is an independent, quasi-judicial agency of the province of Alberta. The

On August 3, 2023, the Government of Alberta enacted the Generation Approvals Pause Regulation, which prohibited the Alberta Utilities Commission ("AUC") from issuing approvals for renewable energy projects between August 3, 2023 and February 29, 2024. The stated purpose of the pause on approvals (resulting in an effective moratorium on future wind ...

Following its seven-month moratorium on new large-scale renewable energy projects, on Feb. 28, 2024, the Government of Alberta announced changes to its renewable energy policy including its intention to advance a suite of new policy measures. These new measures, which will be advanced in legislation, regulation or policy before the end of 2024, ...

Eight months after the Alberta government lifted its moratorium on the development of new, large wind and solar electricity projects, investment has yet to return as companies choose instead to ...

Residents' concerns are echoed in the broader pushback against renewable energy projects in the province. This is part one of a two-part series about the opposition to wind energy in Kneehill County, Alta. ... residents' opposition to wind farm development is a microcosm of larger tensions over the transition to renewable energy in Alberta ...

Alberta's seven-month moratorium on renewable power approvals has left a legacy of dozens of cancelled projects and legal uncertainty, says an analysis done on the one-year anniversary of the move.

Alberta Premier Danielle Smith and Affordability and Utilities Minister Nathan Neudorf announced the changes on Wednesday, which include a ban on new wind projects located within 35-kilometre...

Indigenous communities have shown real leadership in renewable energy generation and energy efficiency projects in Alberta, but getting projects off the ground can be difficult. It's often hard to know even where to start. To simplify the process, we've teamed up with key partners to create the Alberta Indigenous Clean Energy Initiative ...

The Honourable Jonathan Wilkinson, Canada's Minister of Energy and Natural Resources, announced over \$175 million in federal investments for 12 Alberta-based clean energy projects that will create thousands of jobs and enable local economic growth and while delivering clean, affordable energy to communities. Once fully implemented, these projects will reduce ...

The project will contribute to GHG emissions reduction by approximately 16 tonnes of CO<sub>2</sub> e a year,

modernize Alberta's electricity grid, increase stability and energy security, ...

On Aug. 3, 2023, the Alberta government announced a surprise seven-month moratorium on all new renewable energy projects, much to the surprise of the industry.. The government initially said its announcement was a response to requests from independent agencies that oversee the electricity system in Alberta, but successive revelations have proved ...

The Government of Alberta has outlined how it plans to regulate new renewable energy projects. Premier Danielle Smith, along with Affordability and Utilities Minister Nathan Neudorf, said the province is setting a "clear and responsible path forward" for the development of wind, solar, and other types of green power.

TORONTO--Canada's oil-rich province of Alberta has become the latest jurisdiction to push back against renewable-energy initiatives, declaring a seven-month moratorium on new wind and solar ...

Alberta will no longer allow renewable power installations on its most versatile and productive farmland -- termed Class 1 and Class 2 soil -- unless the project's proponent can show how...

Members of the renewable energy industry say they feel like the Alberta government has knocked the wind out of them by pausing all approvals of new power plants for nearly seven months.

The projects announced today are federally funded by Natural Resources Canada's Smart Renewables and Electrification Pathways Program (SREPs), a \$1.56-billion program that supports smart renewable energy and electrical grid modernization projects, including projects that support capacity building -- which received an additional \$3 billion in ...

Get informed Background. On February 28, 2024, the Minister of Affordability and Utilities shared government's intention to advance policy, legislative and regulatory changes for renewable energy development before the end of 2024. These changes will provide clarity around municipal involvement and address recommendations for agricultural lands, reclamation ...

Overview. The Environmental Protection and Enhancement Act (EPEA) requires operators to conserve and reclaim specified land. Reclamation certificates are issued when a site has been successfully reclaimed. On private land, REO operators must maintain updated conservation and reclamation plans. Industry is required to provide landowners / occupants with copies of all ...

Alberta also has some hydro and biomass facilities, and small, but growing generation from solar. Total renewable generation in 2018 was 7 538 GW.h, or 9.1% of total generation. Total electricity generation in Alberta grew from 70 346 GW.h in 2010 to 83 277 GW.h in 2018. Changes in Alberta's electricity generation mix are illustrated in Figure 1.
