Alex foster solar system poster

About the image: This artist's rendering shows the eight major planets of our solar system lined up as if they were transiting the Sun. Although such a view would not be possible in reality, the graphic is intended to show the accurate scale of ...

He eventually tracked down the poster's creator, artist Alex Foster, in Margate, UK, who was also taken by surprise by the question. They eventually figured out what had happened: Foster had found the name of the asteroid, 2002VE, on a list of solar system moons somewhere online (he doesn't remember where).

Nope. Foster didn't have an answer. Apparently, he'd just gotten a list of all our solar system's moons online somewhere, then used that list to create a cool poster. He didn't really think about ...

When artist Alex Foster drew this solar system object on a poster for kids, he misread the temporary name 2002 VE as Zoozve, thus coining this original, odd, and memorable name. It was a long shot.
