

Solar systems can either be connected to or independent of the New Zealand grid. Generally, maintaining a grid connection will cost less than enabling your system to provide you with constant power - unless you live somewhere without existing lines. Grid-tied solar - Most homes with solar panels stay connected to the electricity grid. They ...

Whether you're looking to generate your own power to live a self-sufficient lifestyle or as a cost efficient solution for your new lifestyle block, our team can design systems that use renewable energy sources to meet your requirements.

In 2010 we realised that solar electricity was the future for bringing NZ into the renewables age. At the same time, we needed to find a more efficient way to heat water and we did! We co-created a water heating product that saves New Zealander more than 65% of their current hot water cost - the heart of your affordable home energy system.
