Both large- and small-scale systems are already connected to the grid, offering an appealingly decentralized system for generating power. Solar-energy production is really only worthwhile in the sunniest areas, but its well-proven ability to supply entire sunny communities with clean power makes it a promising alternative to fossil fuels.

Alternative Power Systems, LLC will design a system to provide you with backup power in the event of a utility failure. These systems typically run on existing natural gas or propane. Systems are scalable to allow for powering your entire home or only the essential items within your home. We will discuss options with you and design a custom ...

Buyers may specify power output type, prime power rating, and mounting location when considering alternative power generators. Power Output. Alternative power generators can produce several types of electric power, including alternating current (AC) and direct current (DC) power. In AC power, the movement of the current periodically changes ...

Alternative Power Systems is a leading solar panel supplier based in Cedar City, UT. They offer a range of residential and commercial solar solutions, helping customers reduce their energy bills and minimize their carbon footprint. With a focus on roof suitability and low maintenance costs, Alternative Power Systems provides high-quality solar ...

Living off-grid in Utah requires a thorough understanding of the state's laws and regulations. In this section, we will discuss Utah's zoning laws and building codes, water rights and rainwater harvesting laws, as well as

Utah Associated Municipal Power Systems (UAMPS) is a political subdivision of the State of Utah that provides wholesale electric energy, transmission and other energy services, on a nonprofit basis, to community-owned power systems throughout the Intermountain West. The UAMPS Carbon Free Power Project (CFPP) is in the first phase of investigating the feasibility of a small ...

Utah's onsite sewage treatment law currently does not mention compost toilets. The law does allow "alternative systems" - but you must get a permit first and have the system installed by someone with Level 3 certification. Even then, the law is written in a way that prohibits alternative systems unless all wastewater regulations are met.
