

# Aoc renewable energy surge protector

Your surge protection device has a red LED light that indicates if the device is working properly. If the indicator light is on, please consider that appliances and electronics may fail for several reasons, including routine wear and tear and from power surges that enter a home through phone or cable lines or other means not filtered by your meter-based device.

Without adequate protection surges can damage sensitive electronics, as well as the building's electrical or PV installation, potentially causing fires. You probably already use Eaton's products for robust circuit protection, so why not rely on us for comprehensive T1 - T3 surge protection too and give your customers peace of mind.

Eaton's retrofit surge protective device (RSPF) is a UL 1449 4th edition surge device that provides a reliable, cost-effective, aftermarket solution for surge protection. Designed for easy field-installation, this Type 1 or Type 2 SPD applies the known benefits of integrated surge protection. Built for installation directly into a panelboard or switchboard without any modifications, the ...

Type 3 refers to receptacle surge protectors, a.k.a., power strip surge protectors, which prevent surges from reaching individual devices (whereas Type 1 and Type 2 absorb excess power). It's ...
