I lost a little on my low end but the sound is great. At highway speeds it is nice and quiet so it does not drone you out. When you back off the exhaust the sound is great and so is acceleration. I really enjoy downshifting when going down hill. The back pressure is just awesome. My whole system cost me less then \$200.00.

I have a 2007 Chevy avalanche now this issue has occurred numerous times. The check engine light turns on than the displays shows service traction control, stabilitrak off and engine power reduced. This has happened in the drive way even before putting it in reverse.

been gone a while, im back. Ok, had an 02 AV but my wife totaled it so now I have an 07 ITZ. It seems the power tailgate lock does not work. I can open and close it manually but the keyfob or inside door switch wont activate it. I did some testing and found the actuator works and wiring to it works but fuse #44 under the hood has no power.
