Average monthly electric bill with solar panels reddit

amount the same home would pay for electricity without solar panels.

My normal bill is around 120, but in summer months it's around 150. If I went solar, the monthly bill will be 116 for 25 years. Everything seems legit and sounds right, the only thing I don't like is ...

The amount that solar panels save on electricity bills in the United States can vary greatly. As mentioned previously, an average saving is within a range of 50 to 90 percent with solar panels. This can be significant savings especially if you live in states where electricity rates are high.

Big pool, older house, electric bills averaging over \$320 per month and peaking at \$450 per month during the summer. On paper, solar works well for me since the loan payment is about the average price of my monthly electric bill. So, if nothing else changes, I have set my monthly electric budget about equal to solar payback.

So I started looking into solar recently and got really excited at first. We got a quote from a pretty large solar installer in the area. They had said in their sales pitch our average monthly electric bill was \$191/mo and with financing we would pay \$234/mo for the panels on a 20 year loan (\$45k for 9.7kwh system)

My grandpa lives in a medium house with my grandma and they use maybe an average amount of electricity. He has solar and he pays less than \$30 a month. On the other hand, I have a friend with a wife and one child. He works from home in Abq. and they homeschool their child so they use way more energy than the normal family but PNM still pays him.

What is the average monthly electric bill with solar panels? The average US electricity bill in the first half of 2023 was \$146.92, based on monthly consumption of 881 kWh ...

Solar savings vary widely--but most people who go solar will save between \$20,000 and almost \$100,000 on electricity over the lifetime of their solar panel system. Here's ...

What Is the Average Monthly Electric Bill With Solar Panels? With utility rates rising and household electricity usage increasing, many homeowners are looking for a way to ...

3700+ sq ft with solar panels and 2 4 tons ac we keep temperatures at 73-74 all year long and our electric bill \$13 a month ...Our solar system is 11Kw and we have 35 panels x350w each. super important our roof on south has 31 panels Cost of solar system 32k and rebate after tax credit is 9200 so the system is 22.8k ps this is last year I think you get the credit

Yet, the same household may spend \$260 or less a month if they've installed solar panels and battery storage. The time for solar is now. Going solar can reduce your electric bill dramatically, to the point where it's not a significant player in your monthly budget.

Average monthly electric bill with solar panels reddit

It seems to me that if I knocked off 70% of my average monthly bill & it went down to \$46.5/month I'd be paying \$196.5/month (\$150 Solar + \$46.5 electric bill) instead of my original \$155/month ...

Average annual electricity usage for my house is about 19KW. I got an offer for 9KW solar system on \$28K before Tax credit with cash only. My average monthly electricity bill is \$175. (0.08c per KWH contract I have) I simply think like this... $\$175 - 30 = 145$ (I heard in Georgia, we have to pay 1 Dollar per day to Elec grid provider)

Been trying to almost strictly live with getting my own electricity via solar with a mix of solar panels and a few power stations. Almost \$2000 in total in powerstations, panels, and accessories combined. So far the only things I'm using with the traditional ...

I just purchased a home 5 days ago and got pitched on solar panels. I'm wondering what other people's experience is with solar panels. They said our monthly electricity bill is expected to be \$175 on average, they also said starting April, apparently, it ...

Yeah that seems a little strange, here most people just end up paying for the power they use at night as during the day their homes contribute more power to the grid than they pull out. There may be some special program where they do a group buy and you pay off the panels on a monthly payment through your electric bill.

average month bill = \$200 average annual increase to bill = 1.4% monthly solar loan = \$146 solar system will provide 100% offset (all your electricity) With solar, your monthly electric cost will be \$146 + whatever connection charge your utility has (usually less than \$10, so assume \$10).

Under NEM 3.0 billing, we typically see monthly electricity bill reductions averaging around 50%, even when the total system production matches the total energy demand from the home over the course of the year, as shown below. Example average electricity bill ...

My monthly electric bill is on average between \$100-\$120. Charging my EV costs about an extra \$4-\$6 a day. I live in a US city with sunshine with probably over 300 days a year. I've read that paying monthly for solar panels is about the same if buying, but i'd like to hear from real life experiences. Thanks!

\$22 for grid imports - \$82 for solar exports = -\$60 electricity bill. So instead of a \$44 electric bill before solar panels, you now have a -\$60 bill with solar panels -- a \$104 swing. Electric bill before and after solar panels:

> Now that solar is in our electric bill is running 10 to 14 a month. Most are 10 and change with the low production months being 14 and change since we use power from the NEM bank. This is great since before the electric bill was about 250 and would have been higher due to two increases in 2022.

204 votes, 162 comments. true. Thank you for this post. It works out to be a six-year return period. So if you

Average monthly electric bill with solar panels reddit

had invested money, you would get about 10% after-tax plus the value of the solar system power, which after depreciation (ATO rates of 5% a year) would be worth about \$7500.

Average daily production is 48 kWh. Average monthly production for Apr/May/Jun is 1,480 kWh. 2 HVAC units (one for each floor) for a 2,300 sq ft house. ... something else?) causing it to run way more than it needs to which would also drive your bill up. Also, solar panels can get dusty and become less efficient, and also they work less ...
