

Battery backup power for computer

An uninterruptible power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your ...

Do You Have a Generator in Place - Battery backup systems generally cannot provide power to computer systems for an extended period. Hence, gas or diesel-powered generators often accompany them. When this is the case, your battery backup system only needs to supply power until the generator kicks in and the electricity flows again.

One important part of your plan should be considering battery backups--also known as an uninterruptible power supply, or UPS--which will automatically take over when the power drops or goes out entirely. But no one solution's perfect for everyone.
