

# Best energy provider for solar panels

Compare electricity providers with Canstar Blue. If you are considering solar, the right power plan is paramount. But finding the right provider can be a real challenge. Less than half of Kiwis believe they are getting a good deal on their power, yet only 12% of us have actually changed our electricity provider in the last 12-months.

With average project costs of around \$24,000 to \$29,000, SunPower's panels can be a bit more expensive than many competitors' products. But you certainly get significant value for your money.

Solar panels for homes. Installing solar panels on our home can help us save money on our bills as well as increasing the amount of renewable energy going into the National Grid (and earning us money for selling that excess energy). Solar panels have been subject to two Government schemes to pay householders for energy:

Recommended Provider, so we'd recommend switching to it as your energy supplier if you want to take advantage of its best solar export tariffs. The highest export tariff currently on offer is the Next Export Premium Plus tariff from E.ON, which pays 40p/kWh; however, it's only available to customers who have bought both solar panels and a ...
