Specifications of D Cell Batteries Battery Types. D cell batteries are available in several chemistries: Alkaline: The most common type, providing a nominal voltage of 1.5V.; Nickel-Metal Hydride (NiMH): A rechargeable option that typically operates at 1.2V. Lithium: Offers high energy density and longer shelf life compared to alkaline cells.; Physical Dimensions

Today, they are also known as R20s, after their designation by standards body the International Electrotechnical Commission (IEC). D size batteries are available as both standard non-rechargeable and rechargeable models. What Size is a D Battery? The standard size of D battery is: How Much Does a D Battery Weigh?

NiMH batteries also have an advantage over Lithium-ion batteries. Lithium-ion cells have higher specific energy, but their higher voltage makes them unsuitable for many devices. The only time an NiMH cell is liable to give you trouble is when your device has a battery meter. Most battery meters rely on dropping voltage to estimate the battery ...
