

Blink outdoor solar panel installation

You must first have a fully functional Blink Outdoor (3rd Gen) camera set up in your Blink account, before attaching the camera to the mount. In addition, the lithium batteries must remain in your outdoor camera before connecting it to the solar panel mount. Other Blink outdoor cameras (Outdoor 4, XT or XT2) are not supported.

The solar panels provide constant power without worrying about any battery life issues with the camera's. I only give it 4 stars as the install instructions don't clearly indicate that you need to first charge the panels in sunlight for several hours BEFORE plugging into the camera.

Set up yourself in minutes -- connect Outdoor to wifi and follow in-app instructions. Place mount in direct sunlight with the included kit or with no-drill installation (required hooks sold separately). Works with Alexa -- use your ...

blink solar panel review. Solar panels can easily charge the Blink cameras and you won't need to change batteries for 5-15 years. Personally, because of the low power requirement of the Blink cameras, I would use high-powered lithium batteries (some included in the purchase).
