In August 2007, the California Department of Forestry and Fire Protection's (CAL FIRE's) Office of the State Fire Marshal began developing guidelines for the construction of PV systems in California to address these risks. It organized a task force of fire service and solar industry representatives, building officials, and codes and standards

The California Department of Forestry and Fire Protection - Office of the State Fire Marshal (CAL FIRE-OSFM), local Fire Departments (FD), and the solar photovoltaic industry have developed this guideline for installations to increase public safety for all structures equipped with solar photovoltaic systems.

According to the California Fire Service's Draft Solar Photovoltaic Installation Guideline, dated April of 2008, there is no language related to rooftop PV array switches. The guidelines do not state why such a requirement was omitted.

Before solar photovoltaic installation, a solar contractor should always contact their local fire department to determine if the means or methods to be used will allow for a safe installation that is acceptable to the fire department and meets local code requirements.

Guideline for Fire Safety Elements of Solar Photovoltaic Systems July 17, 2008 Rev: 1/1/10 This document was developed by the Orange County Fire Chiefs' Association, Orange County Fire Marshal Committee. It is based upon the Final Draft Photovoltaic Installation Guideline developed by the California State Fire Marshal (SFM) . The

Draft PV Guideline, April 22, 2008 3 About the Guideline The California Department of Forestry and Fire Protection - Office of the State Fire Marshal (CAL FIRE-OSFM), local Fire Departments (FD), and the solar photovoltaic industry have developed this guideline for installations to increase public safety for all

# California state fire marshal solar photovoltaic installation guideline

OFFICE OF THE STATE FIRE MARSHAL . SOLAR PHOTOVOLTAIC ... and industry representatives) April 22, 2008 . SOLAR PHOTOVOLTAIC INSTALLATION GUIDELINE . April 22, 2008 . TABLE OF CONTENTS. ... In July 2007 CAL FIRE-OSFM established a Task Force to develop this guideline, working with the California Solar Energy Industries Association (CAL ...

How the State Guideline Process Started oMany installation permits began being held up due to concerns over compliance with LA guidelines. oSolar industry began voicing concerns to CalSEIA and the state fire marshal about delays. oState Fire Marshal convened first meeting on August 17, 2007--approximately 20

The Cal Fire Solar Photovoltaic Installation Guideline explains that by controlling the voltage at the module level, the electrical hazards of the PV array are removed, allowing firefighters to concentrate on their main goal of fire suppression rather than energy control for the PV system.

Understanding the Cal Fire Solar Photovoltaic Installation Guideline. Developed by CA Matt Paiss, and Bill Brooks, PE. . Presentation Overview. Brief Overview of History of PV ...

Specific areas within Title 24 identify certain requirements for solar PV installations such as the California Electrical Code, California Building Code, California Plumbing Code, California Mechanical Code and California Residential Code (which applies to residential buildings of one or two units).
