

# Clifford power systems locations

In 2022, Clifford Power provided all the event power for this celebration, in coordination with the festival team in charge of the turnkey power and distribution. This temporary power setup included seven mobile generators ranging from 120 kVA to 180 kVA. For power redundancy, we also provided an additional 150 kVA generator to be ready on standby.

Proper installation of your generator system is an important part of the purchasing process. There are several details to consider, including: determining the appropriate location for the generator and transfer switch placement, utility access, code compliance, concrete pad construction, electrical connections, and gas line installation for natural gas or propane systems.

Clifford Power generator sales representative, Rocky Hollingsworth, suggested a Generac Modular Power System (MPS) to meet the power needs. With this MPS generator package, two paralleled 500-kilowatt generators could be used to meet the 1,000-kilowatt demand, while also providing benefits of cost savings, power redundancy, and scalability for ...
