

# CohnReznick renewable energy summit

The Inflation Reduction Act of 2022 (IRA) introduced and expanded tax credits for clean energy technologies and established a new direct pay provision. Direct pay allows exempt organizations and governmental entities to benefit from these credits by providing cash payments for the value of the credits.

Renewable energy tax credits and incentivized investment structures. When using federal tax credits, the devil is often in the details. Developers focused on the public sector are very familiar with the discretionary grant process but structuring tax credits is ...

According to the U.S. Energy Information Administration (EIA), renewable energy now provides more than 21% of total U.S. utility-scale electricity generation, as noted by EIA in their 2023 Electric Power Annual Report. However, the expansion and growth of the renewable energy industry was not accomplished by merely adding capacity via ...

The IRA includes a number of new factors that can increase the amount of both the production tax credits (PTC) and the investment tax credits (ITC) generated by renewable energy projects. For a renewable energy project utilizing an ITC, the conclusion of a valuation report can impact the amount of the ITC.
