Now is the perfect time to take control by turning free and abundant natural energy into power for your home, farm or business. By installing Solar Panels, Heat Pumps or Wind Turbines, you can reduce your dependence on non-renewable sources and bank the ever-increasing energy savings for years and years to come.

We have installed solar panel systems across Northern Ireland and the Republic of Ireland, in both residential and commercial properties, and have happy clients across the island. We are currently collecting together various testimonials, so in the meantime chat to our team and we'll provide references if required.

The average price in Northern Ireland is £480 per 350kW solar panel, according to the Energy Saving Trust That means that a 3.5kWp system - which is what the average three-bedroom house needs - will cost £4,800.

Installation of solar panels for office buildings can increase the efficiency of your daily operations. Even though the standard efficiency levels of solar panel are 15-20%, they can reach 42% in certain cases. Not all commercial panels are created from the same material and thus have different efficiency ratings.

Solar panel grants for businesses. The Northern Ireland Sustainable Energy Programme for 2024/2025 is expanding to offer grants of up to 20% to all businesses in Northern Ireland for the installation of green technologies.. The funding for 24/25 is currently available to register interest, more details will be sent as to when applications are officially open.
