

Community solar energy projects

The community solar program in New Mexico is still under development. The Community Solar Act, or SB84, was signed into law in April 2021 by Governor Michelle Lujan Grisham. A community-based solar project could benefit individuals, businesses, nonprofits and other groups, who don't have access to energy from solar installations.

What is Community Solar? The U.S. Department of Energy defines community solar as any solar project or purchasing program, within a geographic area, in which the benefits of a solar project flow to multiple customers such as individuals, businesses, nonprofits, or other groups. In most cases, customers are benefitting from energy generated by solar panels at an off-site array.

Community Solar Bill Credit: the monetary value assigned to one kWh of solar energy produced by a community solar project that appears as a payment reduction on a subscribers' utility bill
