## **Cyber power systems 650v would not turn on or charge**

The "mute notifications" button only stops it from beeping during a power outage, and their included software doesn't have anything to stop it from beeping when I turn it on / off. I'm fine with a beep to let me know it is on / off, but I don't want it to beep for the solid 2 seconds when holding the button to toggle it on / off.
