UPS: For Saving Your Work (and Time) From Random Power Outages Related: How to Select an Uninterruptible Power Supply (UPS) for Your Computer An uninterruptible power supply is a different beast from a surge ...

If you have a budget gaming PC, the Amazon Basics Standby UPS is an ideal choice. The UPS delivers a maximum supported output of 360W, providing ample power to drive most budget gaming PCs ...

The type offers enhanced protection by using an automatic voltage regulator (AVR) to correct minor power fluctuations without jumping to the battery mode. It is suitable for environments with frequent power disturbances, providing reliable backup power for your PC or desktop.

One important part of your plan should be considering battery backups--also known as an uninterruptible power supply, or UPS--which will automatically take over when the power drops or goes out entirely. But no one solution's perfect for everyone.

A battery backup, or uninterruptible power supply (UPS), is primarily used to provide a backup power source to important desktop computer hardware components. In most cases, those pieces of hardware include the main computer housing and the monitor, but other devices can be plugged into a UPS for backup power, depending on the size of the UPS.

Even if you're not prone to power outages, many UPS models also include surge protection features. An automatic voltage regulator smoothes over brownouts and spikes without needing to change your battery. It's one of several capabilities you'll want to look for in the best battery backups.

In order to protect your computer against power supply interruptions, you need a battery backup. UPS units are like power strips that contain a big battery inside, providing a buffer against power supply interruptions. This buffer can range from a few minutes to an hour or more depending on the size of the unit.

APC Back-UPS BX600C-IN 600VA / 360W, 230V, UPS System, an Ideal Power Backup & Protection for Home Office, Desktop PC & Home Electronics. 3.8 out of 5 stars 19,025. ... ZEBRONICS Zeb-U725 600VA UPS for Desktop/PC/Computers (not for Routers) with Automatic Voltage Regulation, Black.

If you keep your computer equipment plugged into an inexpensive commercial battery backup device instead of a power strip, you can simply unplug that battery backup from the outlet and plug it into the inverter on your home-brew battery backup when the power goes out. That way your devices won't shut down at all due to the outage.

When power is interrupted, or fluctuates outside safe levels, a UPS will instantly provide clean battery backup power and surge protection for plugged-in, sensitive equipment. APC, a flagship brand of Schneider Electric, offers UPS options for Computers & Peripherals, Networks & Servers, as well as Data Centers & Facilities.
