

## Do i need an apple manufactured power cord to backup

If you use Apple's iCloud backup, your phone will automatically back up every time your phone is locked, connected to power, and connected to a Wi-Fi network. If you use a Mac, your iPhone will back up every time you connect your phone to a port on your Mac (either USB or Thunderbolt, depending on how new a machine we're talking about).

However if you're not pulling a lot of power, it's not really a consideration. If you were running a kilowatt through a cord that long it might be. Generally you should use a cord only long enough to get where you need to go. If it's a permanent installation, I would re-terminate the cord at the plug-in point to eliminate unrequired length.

**What Size Generator Do I Need for Whole House Backup?** The generator size needed for whole-home backup depends on the daily energy usage of the house and the backup power requirements. A general rule of thumb is to select a generator with a capacity of at least 50% of the house's peak energy usage.

**What Kind of Backup Power Do You Need?** ... 1000,1200 and, maybe 1500 VA ratings. but the several models from the same manufacturer often use the same tower box, with just different labels to indicate the power rating. When replacing the UPS batteries, one can actually "move up" in VA ratings. from, say, a 1000 VA to a 1500 VA, by buying a ...
