The electric units discussed above would utilize your existing manual rack, they just sit at your point of choosing along your steering shaft. I believe FFR uses a Flaming River Ford Mustang fox body rack, maybe someone can confirm this.

How it works: The module measures the amount of effort on the steering wheel and amplifies it with the aid of the electric motor. A potentiometer gives you control over the amount of assistance provided, allowing you to fine tune your EPAS experience. For example, you can have maximum power assist while on a parking lot, and less on the highway.
