By my math, using the Lightning in this way worked out to being exactly \$17,299.22 less than if we'd gone ahead with the Ford and Sunrun Intelligent Power Backup/Home Integration System route.

When Ford first announced its all-electric F-150 Lightning pickup, one of its most interesting features was its ability to be used as backup power for your home. Ford claimed its bi-directional ...

Ford lightning backup power

16:42 Can your solar array charge the Ford F-150 Lightning while Intelligent Backup Power is running? Not currently. Ford is looking into this. 17:29 What equipment do you need to use Ford Intelligent Backup Power? The dealership will have to activate Intelligent Backup Power on the vehicle.

The automatic transfer did occur (it took about 10 seconds) and the truck powered my home flawlessly. I ran my entire home for a few hours and then restored power to the house and the system returned to normal operation. My only concern: I never received a notice on my app that I was running on back-up power.

Intelligent Backup Power automatically activates in the event of a power outage when the Ford Charge Station Pro and home management system is installed. Whether you have lost power because of a severe storm, heatwave, or electric company mishap, the Ford F-150 Lightning has got you covered.

Ford, and Sunrun, the nation's leading solar company, are partnering to advance home energy storage and solar power using the F-150 Lightning (TM) truck to power homes and help accelerate the adoption of zero-carbon solar energy; F-150 Lightning with available Ford Intelligent Backup Power can provide power and security during an electrical outage - the first ...

Ford lightning backup power

Ford Home Backup Power turns your F-150 Lightning into a backup generator for your house. It can help mitigate the effects of scheduled outages or rolling blackouts, powering your home even as your house goes off the grid.

If you don't want to go through the hullabaloo (and cost) associated with using Ford Intelligent Backup Power, there is an easier way to ride out an outage with the Lightning. All electric F-150s come with Pro Power Onboard, providing 2.4 or 9.6 kW of AC power depending on level and options.

If Ford F-150 Lightning owners want to access the vehicle's Intelligent Backup Power feature to power their homes during outages they need two main items; besides the F-150 Lightning, of course.

Ford says with Intelligent Backup Power, the Lightning's extended-range battery pack can power your home for three days, and up to 10 days if you properly ration your power usage or combine it with solar power. However, there are many details you need to know if you plan to use the electric F-150 as a home generator.

As far as connecting the ProPower to the house, there are two ways: 1. Use a master lockout or 2. Use a transfer switch. My understanding is that by using the transfer switch, the loads (circuits) which will be fed by backup power are pre-determined to prevent overloading the backup power source (in the case of the ProPower Onboard, 7.2kW).

If you opt for the bi-directional 80-amp Ford Charge Station Pro, plus a home management system and an inverter needed to connect to your home, the F-150 Lightning will be able to output 9.6 kw of ...

Select Intelligent Backup Power. The Intelligent Backup Power screen displays the following: System status; Estimated time remaining; The Start/Stop Transfer button; Tap on the Settings button. Update your Home Backup Power settings: Operation Mode: Automatic: When your system detects a power outage, it will automatically power your home.
