

Form energy

Form Energy is an American energy storage technology and manufacturing company that is developing and commercializing a pioneering iron-air battery capable of storing electricity for 100 hours at system costs competitive with legacy power plants.

Form Energy, co-founded by MIT materials scientist Yet-Ming Chiang, is incorporating renewables into the grid using their iron-air batteries and research from the lab of MIT IDSS Professor Jessika Trancik.

Form Energy's first commercial product is a rechargeable iron-air battery capable of delivering electricity for 100 hours at system costs competitive with conventional power plants and at...

A secretive start-up called Form Energy says it's developing and scaling the production of a new type of rechargeable battery that can store electricity for 100 hours. Form hasn't publicly...

Form Energy, headed by former Tesla engineer Matteo Jaramillo, is making batteries that can keep on supplying the grid for up to 100 hours. Now it says it will build an 85 MW/8500 MWh battery...

At Form Energy, our team is our strongest asset. These are the passionate individuals, each with their own unique skill set and background, who are working hard at Form Energy to tackle the challenge of climate change through low-cost multi-day energy storage.
