Using solar power instead of conventional forms of energy reduces the amount of carbon and other pollutants that are emitted into the environment. Reducing the amount of carbon in our atmosphere translates into less pollution and cleaner ...

Go sol power

An extended lifespan of up to ten years versus three years for traditional lead - acid batteries; Weight savings of up to 65 percent; Zero maintenance; Safer to store. Lithium-ion batteries don't vent potentially dangerous gases and can be stored in enclosed locations

The DC power in your batteries allows you to run lights, fans, slide-outs, and 3-way fridges. In fact, when paired with the right battery size, a 190-watt solar panel can offset the DC use of a family of 4 for up to 3-days!

All GoSolr systems are designed to feed excess electricity back to the grid. It depends on your consumption and how many batteries you have. If you're mindful of your consumption, you'll have enough power to cover a normal 2.5-hour load-shedding cycle.

Go Solar Power installed solar w/battery backup on our property in January 2024. We are very pleased with their professionalism & excellent customer service from start to finish on our solar project. The folks at Go Solar take great pride in their work every step of the process. We'll continue to enjoy peace of mind that we have solar to power ...

Innovative practices like solar and agriculture co-location, called agrivoltaics, offer farms and agricultural businesses the opportunity to power their daily operations with solar energy and diversify their revenue streams. And our SolSmart program is working with hundreds of communities that want to enable more people and businesses to go solar.
