

Green breakdown the coming renewable energy failure

Think wind, solar, and batteries can replace the hydrocarbon fuels that power our modern industrialized society? Today, our guest will show why the Net Zero agenda-a forced transition to renewable energy-is costly, dangerous, and destined for failure. Using science, economics, and in-depth analysis, he will expose the weaknesses in the planned green energy ...

Green Breakdown shows why the Net Zero agenda--a forced transition to renewable energy--is costly, dangerous, and destined for failure. Using science, economics, and in-depth analysis, Stev... ?Politics & Current Affairs · 2023

5/5: Green Breakdown is well researched and it is full of data and graphs from NASA and NOAA. Environmentalist and politicians warn that hydro-carbon energy sources such as oil and gas must be illuminated to save the planet. Renewables such as solar, biofuels and wind must be adopted. Over the last 20 years the world has spent \$5 trillion to promote solar, ...

In Steve Goreham's new book, Green Breakdown The speaker, author, and researcher on environmental issues, energy, and public policy warns of the coming Renewable Energy Failure. Do you think wind, solar, and batteries can replace the hydrocarbon fuels that power our modern industrialized society? Green Breakdown shows why the Net Zero agenda, a forced transition ...

Green breakdown the coming renewable energy failure

29, 2023

In this episode, Jack invites Steve Goreham, author of the newly published book *Green Breakdown: The Coming Renewable Energy Failure*, to the program. Jack and Steve discuss global warming facts versus fiction, the impact on electricity prices of renewable energy, and what could the economic consequences be of a so-called green transition ...

Think wind, solar, and batteries can replace the hydrocarbon fuels that power our modern industrialized society? *Green Breakdown* shows why the Net Zero agenda--a forced transition to renewable energy--is costly, dangerous, and destined for failure. Using science, economics, and in-depth analysis, Steve Goreham exposes the weaknesses in the planned ...

The world annually spends hundreds of billions of dollars a year on wind turbines, solar panels, electric cars, biofuels, heat pumps, and the hydrogen economy. But the renewable energy transition is in trouble and headed for failure. *Green Breakdown* predicts a coming failure of Net Zero and a mixed hydrocarbon and renewable energy future.

Steve Goreham is a speaker on energy, the environment, and public policy and the author of the new bestselling book, *Green Breakdown: The Coming Renewable Energy Failure*. Tags American Dynamism

Think wind, solar, and batteries can replace the hydrocarbon fuels that power our modern industrialized society? *Green Breakdown* shows why the Net Zero agenda-a forced transition to renewable energy-is costly, ...

But physics and economics strongly oppose the development of a green hydrogen fuel industry. Get ready for a spectacular failure of these government-sponsored efforts. Steve Goreham is a speaker on energy, the environment, and public policy and the author of the new bestselling book *Green Breakdown: The Coming Renewable Energy Failure*.
