Green Leaf Solar & Electric, San Jose, California. 10 likes. With over 40 years experience providing quality electric and solar services in San Jose, we know how to find the best solutions for you....

Paid a substantial amount of deposit by Barclaycard for Solar Batteries on 29-9-23. Installation date of 29-11-23 was given after waiting 3 weeks. I contacted Green Leaf a week before installation was due to be told could not do that date. Another date was given. Received another excuse. A further date and another excuse.

We have the chance to make a change and do our part towards reducing our carbon footprint. Every kilowatt of solar energy installed lowers your home's carbon footprint by over 3,000 pounds of CO2 emissions a year. Your new solar array will produce the cleanest energy available with a 0% emission rate.

All of the PV systems installed by Green Leaf Solar so far have been a "grid tie" system. This means that you have the convenience of the utility company's power during the evening and cloudy days and the PV system is more of a supplement feeding your home and the utility company when the sun is out. ... That's just the energy savings ...

With over a combined 20 years of experience and education, you can be sure that we can assist you in acquiring a solar power system for your home or business. We stand out from our competition because we strive to do all we can to benefit our customers.

For years, synthetic biologists have made numerous attempts to improve the ability of organisms, such as bacteria, to translate solar energy into chemical production, but efforts have been met with little success. My research group set out to rethink photosynthesis by assessing how a leaf converts solar energy to growth.
