

Honda clarity power system problem

Our 2018 Clarity Plugin Hybrid was at airport parking for 4 days, when we picked it up yesterday to drive home we had a warning light "Transmission Problem Apply Parking Brake When Parked", and transmission indicator D was flashing. It's Sunday afternoon, and I figured if the warning was just to apply parking brake when parked, it was ok to drive.

The contact owns a 2018 Honda Clarity plug-in hybrid. While driving 5 mph, the battery was depleted and the engine mode engaged; however, the vehicle lost power and failed to accelerate.

@2002, Purchased the 2019 Honda Clarity in March of 2020 brand new. Honda clarity power system problem

Turn on the power system as follows: 1. Touch the center of the POWER button with the H logo on the smart entry remote while the indicator on the POWER button is flashing. The buttons on the smart entry remote should be facing you. The POWER button flashes for about 30 seconds. 2.

I've used a dozen different public 240 L2 stations with my Clarity so far, and have never run into this "charging system problem" fault. FYI. However, I encountered a different charging issue with one specific public charging stations, where the station would report the car drawing little power and it would stop charging (assuming full charge ...

Collision Mitigation System Problem; Honda clarity Road Departure Mitigation System Problem; ... The cruise control wont work and neither the collision detection system. my clarity is a 2018 has 139K miles on it, i put about 500 miles on it a week. I bought it in 2020 with 29k miles on it. I changed the battery a year ago, no rats on my end.

----- - New Clarity Plug-in Hybrid Owner (2018) Thanks for the tip, and of course it worked. This must be a poor translation from Japanese to English as it is miss-leading in multiple ways: 1) The "Power Button"; as noted 2) The Anti-theft system, which the Clarity has one for security. I suffered a massive battery failure and towed it home.

The only thing the 12V battery does is power up the 12V system prior to the start of charging, and that takes very little power. ...
