This is a recently purchased laptop and the spec says 10 hour battery back under test conditions. I fully charged the laptop and tried to look at the remaining back up time after disconnecting from the AC power under no load. The tool tip says around 5 hours remaining. Please let me know if there is...

No, you don't need a sign wave inverter to run your notebook. The power brick does a good job of taking the crappy AC power a inexpensive inverter puts out and converting it to DC for your notebook to use. The power brick does act as a " filter " as a result of this process. But, without " clean " power the brick does not run as efficiently and ...

Backing up important software and data to an external drive, an online resource, or an external location is recommended. This provides an added layer of data protection, allowing for an easier recovery time if needed. For business computers, check with your company IT department or your local IT service for other backup solutions.

Best course is not to run the laptop on the powerbank power unless it is 135w +/- or more, but plug it in with the laptop off to charge the battery. The Krisdonia device you ask about is likely to be able to charge the battery and run the laptop while powered on.

The old standby for backup is to copy your files to an optical disc. The downsides are limited capacity and speed. Also, it's harder than ever to find computers with CD drives. You can buy one to plug in, however, pretty cheap. Amazon has some for less than \$30 that connect via USB-A 3.0.

The Anker PowerCore+ power bank is TSA-approved and weighs about 1.5 pounds. Unlike many other laptop batteries, it's surprisingly compact at 7.7 x 3.5 x 2.4 inches, making it an easy addition to your carry-on or commuter bag. And it holds a ...
