

The journal publishes original research on design, implementation, grid-integration and control of sustainable energy technologies and systems. The Transactions also welcomes manuscripts on design, implementation and evaluation of power systems that are affected by sustainable energy systems and devices.

The IEEE Transactions on Smart Grid is a cross disciplinary journal aimed at disseminating results of research on and development of the smart grid, which encompasses energy networks where prosumers, electric transportation, distributed energy resources, and communications are integral and interactive components, as in the case of microgrids and active distribution ...

Doing so is considered a breach of confidentiality because AI systems generally learn from any input. The articles in PES Transactions/Journals are peer reviewed in accordance with the requirements set forth in the IEEE Publication Services and Products Board Operations Manual. Each published article was reviewed by a minimum of two independent ...

Due to limitations of low power density, high cost, heavy weight, etc., the development and application of battery-powered devices are facing with unprecedented technical challenges. As a novel pattern of energization, the wireless power transfer (WPT) offers a band new way to the energy acquisition for electric-driven devices, thus alleviating the over ...
