JK BMS - a month ago I would have said this is the clear choice. However the recent posts about the lack of support, SOC problems, etc make me not want to get it. ... Mine just works and I can monitor 15 if networked together using Solar Assistant. Danke Solar Wizard. Joined Apr 5, 2022 Messages 2,809 Location 36N 93W. Oct 23, 2024

Solar Calculator The cost of solar for your home can be less than Rs.50,000. No matter the size, a well designed and installed system will pay for itself within a few years. There are several factors to consider that could affect the overall cost, including how much energy your home uses, the size of your ... Solar Calculator Read More »

This is the first time i am reviewing j.k solar. I am a customer since last 4 years. Have two projects installed. So much satisfied with their service that i refered them to more than 6 families and they are happy customers too. Thumbs up for jk solar. Keep it up. Read more. Mohit Kataria. 3 ...

whole house solar panels systems, how to calculate solar panels needed, how much solar power to run house, how much solar do i need calculator, how much solar do i need, how much solar power do i need, calculate how many solar panels i need, how many solar panels will i need Bhulaiyan, Chattar Manzil, State Bar Association, all six simple for research?

The Solar Controllers (Midnite Classics) have a ModBus protocol stack which can be interacted with by using software. My Inverter/Charger has advanced programming and features. Their protocol stacks are not public. I have the stack info but with an NDA so I cannot share it. My current JK's are JK-B2A24S20P, accurate and not a problem in fact !

I have a 200A JK inverter BMS connected to each of the 2 DIY packs wired in parallel. The JK BMS simply worked...first time with no headaches. The 2 JKs in parallel works well together with the JK master doing all the necessary calculations for the entire battery bank and communicating that to the inverter.
