R E A L S O L A R S Y S T E M 1.12 License: CC-BY-NC-SA Intention: This mod aims to transform the Kerbol System into the real solar system which we live in and conduct realistic space exploration. The orbits are accurately tuned to resemble the real life counterpart planets and also feature their...

These faraway planets provide a challenge rarely encountered in Kerbal Space Program; you'll have to figure out new transfer windows, manage your power supply differently, provide your spacecraft with more Delta-V and be ready to travel years or even decades. This version of Outer Planets Mod has been built to work for KSP version 1.3.1 - 1.12.*.

Using the StarSystems Mod and Krag's Planet Factory, anyone is now able to create full, working multiple solar systems complete with planets and moons in KSP. This is just the beginning for this mod and it's possibilities!
