

Ksp other solar systems

Description. Career should be working now! Upgraded to work with 0.90! Thanks Medsouz! Combining the wonderful work of Kragathea, Dooz, Medsouz and OvenProofMars, this mod adds two more stars with their own planetary systems to the game, and a black hole!

2.2.10 for KSP 1.12.5 | Download: 110.61 MiB | Released on: 2023-11-22 The Outer Planets Mod is a mod that expands the outer edges of the Kerbol system to create something akin to the real Solar System's. It adds Kerbalized versions of Saturn, Uranus, Neptune and Pluto as well as several of these planets' moons. These faraway planets provide a challenge rarely ...

Kerbal Galaxy Revamped is a popular one and galactic neighbourhood is also a good one because it's actually compatible with a bunch of planet packs that usually just add planets to Kerbol but are now given to other stars. I don't think it's compatible with 1.2 though while I think Kerbal Galaxy Revamped is.

Outer Planets Mod is a mod that expands the outer edges of the Kerbol system, to create something akin to the real Solar System's. It adds Kerbalized versions of Saturn, Uranus, Neptune and Pluto, just like real-life. These faraway planets and moons provide a challenge rarely encountered in Kerbal Space Program.

The Kerbal Space Program subreddit. For all your gaming related, space exploration needs. ... ADMIN MOD Stock KSP to Real solar system / Realism overhaul - a Transition guide. Guide Introduction. Hello all! This is going to be a super long post. ... Other long-term engines include Nuclear and Ion propulsion. (speaking of Ions, you're going to ...

This is a continuation of Stock Size Real Solar System, Originally by @sDaZe and myself. Big thank you to @OhioBob for all of the help with atmospheres and other sciency things I don't understand! This makes RSS, well, you guessed it, stock size! Change Log:v0.0.3.1 Update version file for 1.3.1 ...

Created visuals for stock system 1.7.1 (April 9, 2018) Updated to version 1.4.2 of KSP Scatterer adjustments ... (most binary stars orbit each other rather elliptically). I'm assuming the reason why Valentine's periapsis is so close to the outer planets in JNSQ is because JNSQ is scaled up quite a bit but Extrasolar is not. ... Kerbal Space ...

Outer planets is the standard. Expands the stock solar system with analogs for the rest of the major and several minor planets. Kerbol Origins also adds planets, and they're all kind of weird.

Mod We have put our best effort to make the solar system good. This mod is a Collab with @Cyrus Playz to make a revamp of the stock planets AND add new planets and star systems First Released on KSP's 10th anniversary. Key : Green = Done, Yellow = WIP, Red = Planned Plans :IkeTyloDresPolLaytheSun...

As RSS, KSRSS is a mod intended to transform the stock solar system into the real solar system, but at stock size, with the objective to let you explore the solar system without many mods necessary in a RSS save. Also, we worked hard to make every body of the system pretty and unique. For example, with KSRSS, you can find dust storms on Mars, geysers on ...

Small satellites for Jupiter (Adrastea, Amalthea, Metis), Saturn (Daphnis, Epimetheus, Hyperion, Janus, Pan, Pandora, Phoebe, Prometheus), Neptune (Proteus) and Pluto (Hydra, Kerberos, Nix, Styx). Trans-Neptunian dwarf planets (Makemake, Orcus & Vanth, Sedna). Original KSP forum thread

Ksp other solar systems

There are many other "simplified" mods, so don't be silly, please. My KSP Real Solar System + Interstellar and 30 other mods (for freezing, bases, etc.) are waiting for your wonderful mod! ... TRAPPIST1 did not adequately ...

let me see, there are a total of 15 planets you can land on including kerbin. i really think this is a bit too small. maybe some other solar system should be added. so we dont always have to use mods?! mods do sometimes slow your game down. i really wish that ksp added some other planets or moons or solar systems.

I just bought KSP today and, holy crap, its fun. I really enjoy it a lot. I have only scratched the surface, as far as content is concerned. I was only wondering if they plan on adding other solar systems, other galaxies, etc... Possibly multiple types of planets with different materials so people would have to find said planets in order to get rare materials for ship parts or ...

This is the KSPI-E release thread where we announce any releases of KSPI Extended. If you want to chat about KSP Interstellar you can do it at our new Guilded Server (old: KSP Interstellar Discord Server). For technical questions or Mod support, please ask them in the KPIE Support thread. For talk about new development and features request you have to be in ...

NO LOGS, NO SUPPORT. This solar system completely replaces the stock system. Version 1.6.6.0 Changelog Added Optional Mods: GPP_Rescale for 2.5x and 10x versions of GPP. Added extra launch sites to MechJeb2 config. ... to KSP: Unlike other planet packs which promise new planets to explore in addition to the stock ones, a fraction of which ...

Good mods for ksp that add more stars and more planets. Outer planets is the standard. Expands the stock solar system with analogs for the rest of the major and several minor planets. Kerbol ...

Quarter Size Real Solar System (2.5x Kerbin scale) Quarter Size RSS is a mod that uses the great work from @NathanKell and creates our Real Solar System in a smaller scale in KSP. At 1/4 the size of the Real Solar System, it is still 2.5 times larger than stock KSP and provides a huge challenge to players, but can be achieved with stock parts. It has been figured ...

Career Works!Updated for 0.90 Thanks Medsouz!Combining the wonderful work or Kragathea, Dooz, Medsouz and OvenProofMars, this mod adds two more stars with their own planetary systems to the game, and a black hole! I have tweaked them to work together into a huge expansion of the kerbal universeFi...

Other potential planets include Puf, Ovin, and the Rask-Rusk binary system. Name Discovery. On February 26, 2023, Two names for two star systems were found in the games code, the Qeg System and the Tuun System, by u/DartFrogYT on Reddit. Nothing is known about these systems other than that they are likely coming in the exploration update or later.

Cannot retrieve latest commit at this time. Real Solar System Expansion (RSSExpansion) is an add-on for

Ksp other solar systems

Real Solar System, adding multiple new planetary bodies to the Real Solar System (RSS) modification. New bodies include: Various asteroids and comets (67P, Bennu, Chariklo, Halley, Ida & Dactyl, Juno, Lutetia and Pallas).
