Free consultation with a company representative to review your custom design and assess the status of your roof and electrical system, your roof's solar exposure, your energy usage, credit score ...

Under a solar lease, you won't own your solar system, but will still benefit from its generated electricity. A leased solar system can make selling your home more difficult because the next owner may not want to take over your lease payments. What is a solar lease?

Owning your panels with a solar loan means that you can take advantage of rebates and incentives upon installation. With a solar lease, the system's owner is the solar company, so they receive financial incentives instead. For this reason (and others), lifetime savings with a solar loan are usually higher than those with a solar lease.

While rent-a-roof companies sat back and enjoyed an average of \$23,000 in Feed-in Tariff payments, ... However, these solar lease companies may include clauses in your contract which allow them to - among other things - receive all your export payments, stop you from selling or altering your property, and prevent you from exiting the ...

Understanding Solar Leases. The US Department of Energy's Better Building Initiative defines a solar lease as "a type of lease specific to solar energy systems where the lessor owns the solar equipment and the customer rents it at a fixed monthly rate." In other words, after you sign, the solar leasing company will still own the panels installed on your roof ...

The lease typically includes maintenance and monitoring of the system by the solar company. One example of a Solar Roof Lease is where the homeowner pays a fixed monthly amount over a set period, usually around 20 years, for the use of the solar panels. ... At the end of your solar roof lease term, you typically have several options to consider

Solar leases are very similar to power purchase agreements (PPAs). With both options, a solar developer installs and owns the solar panels on your roof. The two differ in how you pay for the solar energy. Solar lease payments are the same every month, whereas solar PPA payments are based on the amount of energy the panels actually produce.

We cover all the benefits of renting your roof for solar, explain how the process works, and answer some of the most frequently asked questions about solar roof leasing. If ...

A solar roof rental agreement is a contract between a property owner and a solar energy company in which the company installs solar PV panels on the roof of the owner's property and then pays the owner a fixed monthly payment in exchange for their roof space. So they are essentially renting out your roof space to make solar power more accessible.

For example, a 390 kW solar project hosted on a 35,000 ft² roof in National Grid utility territory, could result in the lease rate from Pivot Energy of \$65,000 annually. Over 20 years, the business would gain an extra \$1.3 million! Of course, many factors inform the exact amount of the roof lease payment a solar developer can offer beyond just ...

For companies with high electricity consumption, it is particularly worthwhile installing a photovoltaic system
