WARNING: WARNING: Lithium-ion batteries and products that contain lithium-ion batteries can expose you to chemicals including cobalt lithium nickel oxide, ...

I have been thinking about putting in a separate battery for my Livescope setup. I've been exploring buying a Lithium battery strictly for my Livescope. Have any of you guys used a 12v, 20+AH Lithium battery? Also, I've read where some people say your unit and the black box should be on the same battery.

I installed a voltage booster for my buddy, holds the voltage at 15.25v, no need to buy another battery / 14.8 or 16v lithium. He runs all his stuff off 1 100ah lithium. Nice part about the booster is, cheap, waterproof, and easy to install. Even if the battery drops in voltage, you'll stay at 15.25v giving you a super clear image. Hope this helps

I have been running the ZPRO Lithium 12V 50Ah battery in my Jackson Kayak Byte FD to power my Livescope and 9-inch graph. It's impressive how good my screen looks and how it's good all day. ... The 12.8V 160Ah Impulse Lithium battery will run 5 graphs, plus Humminbird 360 and Active Target 2 modules, all day for several days before needing ...

I run one Dakota lithium battery. I have a double post at the terminal to run both my 93sv and the PS22 transducer off one battery. It works fine and I have fished for 6+ hours with it. ... well if I could as I was looking at the 9? garmin livescope. Thanks. Deuces. Posts: 5227. February 14, 2020 at 9:56 pm #1915441. For these big power-hungry (and feature rich) models we recommend the Dakota Lithium 18 amp hour (Ah) battery or the Dakota Lithium 23 amp hour (Ah) battery or the Dakota Lithium Powerbox+ 60: Garmin Panoptix Livescope. What size battery do I need for my Garmin fish finder? 12V 8Ah SLA Battery Replacement for Garmin Fishfinder 90 GPS.

I researched this before buying a lithium battery. You take the amp draw of Livescope system time the amount of usage time you need to get AH size battery you need. Here is the numbers for my unit. Garmin 93SV/livescope black box draw 2.8 amps. I needed my unit to run 6hrs at a time. $2.8 \text{ amps} \times 6 \text{ hrs} = 16.8 \text{ ah}$ or more needed to run livescope for ...
