## Lithium battery power supply

With a 40-60% smaller footprint and 60% lower weight, lithium battery backup solutions for UPS systems take up less space that can be leveraged for critical equipment and weigh less in transport. With lithium-ion UPS backup systems, you don't have to sacrifice power for floor space.

The various lithium-ion battery chemistries supply a wide range of power densities, energy ratings, and safety attributes. The differences between each lithium-ion chemistry now allows clients to customize their battery solutions to fit the design requirements and use cases of their UPS battery backup system.

The battery chemistry is lithium iron phosphate, and this unit can additionally take in 500 watts of solar charging power. It also has a "UPS feature" for power switchover of 20ms.
