September 10, 2024. Augusta, MAINE - The Maine Governor's Energy Office (GEO) released the following statement today on the Maine Public Utilities Commission's issuance of a Request for Proposals for new renewable energy projects: "This Request for Proposals ensures that new renewable energy projects developed in Maine under this competitive solicitation will reduce ...

Is storing energy -- in batteries, or reservoirs, or fuel cells -- considered generation or distribution? That was one of the major questions underlying lawmakers' discussion during a hearing this week on LD 1850, a bill aimed at increasing the amount of energy storage in Maine.. Utility companies (Central Maine Power and Versant) used to own both the means to ...

3 days ago· Welcome to the Maine Public Utilities Commission website. Our mission is to serve Maine by balancing access to safe and reliable utility services with rates that are just and reasonable for customers and public utilities, while minimizing energy costs and greenhouse gas emissions. Live and Recorded Video

Janet Mills, Governor of Maine, has signed legislation that makes hers the ninth US state to have adopted a deployment target for energy storage. On 22 June, the governor's office announced that Mills had signed "LD 528: ...

possible, including 80% renewable energy by 2030 and 100% renewable energy by 2050. Today, Maine has installed nearly 50 MW of energy storage, with hundreds of MW of planned projects and potential projects in the interconnection queue. This study, commissioned by the Maine Governor's Energy Office (GEO) and conducted by Energy and

This \$9.7 billion program funded through the Inflation Reduction Act provides grants and/or loans from the U.S. Department of Agriculture for rural electric cooperatives to make energy efficiency improvements to eligible generation and transmission systems, to purchase, build, or deploy renewable energy, zero-emission systems, carbon capture ...

As Maine grows the portion of electricity derived from renewable sources to cut greenhouse gas emissions, increased energy storage resources are needed to ensure affordable, reliable clean power for Maine households and businesses. LD 1850, An Act Relating to Energy Storage and the State's Energy Goals, was signed into law by Governor Mills on June 30, 2023.

KCE's CEO, Jeff Bishop, Participates on Maine Commission for Energy Storage. With significant renewable energy generation potential but lack of transmission lines, energy storage has the opportunity to help Maine achieve its ambitious ...

An Act To Advance Energy Storage in Maine L.D. 528 GOVERNOR'S ENERGY OFFICE March 9, 2021
Senator Lawrence, Representative Berry, and Members of the Joint Standing Committee on Energy, ... Several
members of this Committee served on that Storage Commission, and the . Page 2 of 3

Northern Maine Renewable Energy Development Program established by P.L. 2021, Chapter 380. In October,
the Commission announced the ... integration of 911/988 in Maine. The Commission will submit this report
and draft legislation next month. Low-income ... energy storage technologies and heat pumps, including those
used for space and water ...

L.D. 1895 established the Maine Offshore Wind Renewable Energy and Economic Development Program,
which will further the development of responsible offshore wind projects in the Gulf of Maine in a way that
helps the State meet its greenhouse gas reduction obligations, stabilize energy prices, benefit Maine's
economy and families, and minimize ...

"This legislation provides funding to strengthen the research, development, and deployment of energy storage
and low-emission technologies and manufacturing in Maine and throughout the United States," said Senator
Collins. "I am pleased the bill supports the Northern Border Regional Commission, which promotes economic
development in ...

In 2019, Governor Mills signed legislation that increased Maine's RPS to 80 percent by 2030 and set a goal of
100 percent by 2050. In addition, that legislation required the Maine Public Utilities Commission (PUC) to
procure long-term contracts for new clean energy generation, which may be paired with advanced energy
storage.

Maine's renewable portfolio standard (RPS) establishes the portion of electricity sold in the state that must be
supplied by renewable energy resources. In 2019, Governor Mills signed legislation that increased Maine's
RPS to 80 percent by 2030 and set a goal of 100 percent by 2050.

On 22 June, the governor's office announced that Mills had signed "LD 528: An act to advance energy storage
in Maine". It sets out a state goal for energy storage development of 300MW of installed capacity within
Maine by ...

energy storage market in Maine oSatisfies the requirements set forth in 2021 Act to Advance Energy Storage
in Maine, which also sets Maine storage targets -300 MW by 2025 -400 MW by 2030 Study questions:
oTechnology Assessment: Which storage technologies and use cases are likely to be valuable to Maine, today
and in the future?

Final Report of the Commission to Study the Economic, Environmental and Energy Benefits of Energy
Storage to the Maine Electricity Industry. Commission Meeting Dates: Monday, December 2, 2019 from 1:00
p.m. - 3:00 p.m.

The Maine Governor's Energy Office (GEO), established within the Executive Department and directly responsible to the Governor, is the designated state energy office tasked with a wide range of activities relating to state energy policies, planning, and development.

The Order establishes priorities and requirements for electric utilities to develop integrated electric grid plans addressing affordability, reliability and resilience, and grid modernization to meet state clean energy goals July 25, 2024. Augusta, MAINE - The Maine Governor's Energy Office today released the following statement welcoming ...

The Northern Maine Renewable Energy Development Program project would support GIP program goals by addressing key system needs and challenges that cause or contribute to long interconnection queue times for clean energy, as well as increasing supply of diverse sets of location-constrained energy resources to enhance resource adequacy and reduce ...

Distributed Solar and Energy Storage Program July 1, 2024 Purpose This document provides an update on the development of the Distributed Solar and Energy Storage Program (hereafter "the program"), established by statute as a program of the Governor's Energy Office (GEO). M.R.S. §

In recent years, many states including Maine have recognized the need for enhanced grid planning to meet clean energy goals in an efficient manner. Transmission and distribution utilities conduct grid planning to forecast how much electric demand there will be, whether their current assets and equipment are sufficient to meet that need, and, if ...

Terry says a battery storage facility planned for her hometown is on an entirely different scale than those now operating in Maine. "The storage facilities that we have right now are on the smaller size, 10-15 megawatts per facility, where the one that's coming to Gorham is hopefully going to be up to about 150 megawatts of storage," she ...

The Governor's Energy Office is responsible for developing the State of Maine Energy Assurance and Emergency Management Plan to provide the Federal government, Maine Governor, the Legislature, the Executive Departments, the energy industry and the general public with a clear, concise and comprehensive blueprint and strategy to address a potential or actual energy ...

initiatives to use energy storage to reduce peak electricity demand." It might be more in line with the nature of the commission's recommendations to "Direct the Efficiency Maine Trust to consider developing/study opportunities to use energy storage to reduce peak electricity demand." (See also Rep. Grohski comment # 8 below). 3.
