Muddy Pro Cam 14 is a high-end camera released to the market with tons of remarkable features and specifications. It is the next thing to look out for especially for professional high-quality pictures and videos. The camera gives you a good hunting experience by capturing all the happenings in the woods in the most natural way.

The cameras require 6 AA batteries or an alternative source of power including a 12 volts direct current. The user has to source for the batteries as they don't come as one package with the camera. Muddy Pro Cam 14 comes equipped with invisible 18 HE LED technology which is quite friendly to the animals.

Muddy trail camera solar panel

Spy Point Solar Panel. The Spypoint solar panel is a 6.3" x 4.7" solar panel that works on a 12 volt battery system. It comes with a 9 ft cord and a few extra connection cables as well. The problem with the Spypoint solar panel is that even though it is a Spypoint specific product, it doesn't connect directly to any camera because this solar panel does not have an internal battery.

The Muddy Manifest 2.0 Cellular game camera runs on 8AA batteries and it has an external power jack for a solar battery pack (not included). Muddy has always been known for the exceptionally high end feature and unwavering quality and now in addition to that, the line has been expanded and revolutionized to contain even more options.
