These batteries feature the latest cutting-edge LiFePO4 technology. We strive to provide customers with the most advanced battery technology for their golf carts. Let's take a look at why these ...

In the past, electric golf carts primarily used lead-acid batteries. These batteries are the first type of rechargeable battery ever created. Lead-acid batteries have powered many different vehicles and items over the years. However, since 2018, lithium batteries have become more and more popular for golf carts. Lithium batteries are a newer technology with a lot of ...

You've got two choices when it comes to golf cart batteries: Deep cycle batteries ... If you need help converting your golf cart from lead-acid batteries to lithium batteries, ... If you have any other problems or questions about lithium batteries for golf carts, contact Patriot Power Source at 888-287-2864. We're always happy to help!

Since 2018, lithium batteries have grown more and more popular for golf cart owners. In fact, some golf carts now come already stocked with them. While you can still purchase one with lead acid batteries, they are slowly getting harder to find and no longer the standard. It's likely that in the near future, golf carts won't even be offered with lead acid ...

The charge cycle lifespan is basically the number of times lithium ion golf cart batteries can be charged before they pack it in. When looking for a lithium battery, you should expect a lifespan of no less than 1500 cycles. If you were to play one round of golf every day, these batteries should last for 4-5 years.
