Residential sump pumps typically come in one of two horsepower ratings: 1/3 hp and ½ hp.When shopping for a portable power station or generator to back up your sump pump, it's essential to understand the difference between starting and running watts.. Most motor-driven appliances -- like sump pumps -- require more electricity to start than to run, sometimes ...

The backup is designed to kick on automatically if your power or sump pump fails, which means you don"t have to worry about sleeping through a power outage to wake up to a flooded basement. Battery backups also earn points for offering a substantial pumping volume, which is important if a power outage is due to a storm that"s driving water ...

During a power outage, your backup sump pump is often your only protection against basement flooding. Battery backups are a problem in that their capacity to hold a charge reduces over time and for that reason often fail during a severe storm, when they are most needed. Water Commander (TM), the water-powered backup sump pump, solves this problem.

Battery Backup Supplies power to 1/2 HP (or less) sump pump during utility power outages for operation up to 120 minutes. The runtime is based on an intermittent sump pump operating at a 10% duty cycle. Surge Protection Diverts excess voltage away from sump pump during an AC power surge or power spike to prevent damage. Plug-and-play Installation

The backup sump pump can run intermittently for days on a single battery charge from either the Basement
