Had the message "Power System Service Urgent" along with a battery warning light pop up on my dashboard recently, as nothing seemed amiss, I duly ignored it and carried on, restarted the car, no light or message, lights bright and everything electrical working fine. A week and 350 miles later...

Check your battery voltage, especially when you have had your vehicle sitting for a while. Do this before you start your engine. Make sure that you get your alternator bench and battery bench tested. Now, if you notice the power system service urgent warning, you also need to observe if the light is solid or flashing.

Power system urgent volvo
