Raclan Box Rechargeable batteries and their chargers are placed into and plugged in within the box. The door is secured using the pivoted handle and the external power supply is turned on. The electronic system now monitors the charging process, the rechargeable battery status and the condition of the interior space. If the monitoring sensors [...]

The new UN numbers and regulations in ADR 2025 are crucial for the safe and compliant transportation of batteries and other hazardous materials. The introduction of UN 3551 and UN 3552 shows the growing importance of sodium-ion technologies and their specific transportation requirements. The other changes expand the regulations for other hazardous ...
