It is required by the National Electric Code. When using a portable generator to power appliances in your home, the National Electric Code (NEC 700.5 and 701.5) requires you have a properly installed transfer switch. This is especially important if you plan to sell your home in the future, as improper installation is a code violation.

The Reliance Controls TF151W Transfer Switch is easy to install and easy to use. It is ideal for controlling a single 15 Amp circuit, such as a forced-air furnace using a grounded extension cord. The transfer switch ensures that you can safely use back up power during a power outage without having to worry about back feeding the utility line.
