The SolarEdge partnership will allow Rocky Mountain Power to take advantage of the fast response and accurate cloud control of SolarEdge smart inverters and distributed batteries to help...

Why Rocky Mountain Power's potential rate hike in Utah matters. The combination of Rocky Mountain Power's drivers for a rate increase in Utah and how the utility has approached increases in other territories suggest the initial proposed rates could be between 8% and 20% higher than current electric rates. For reference, Utah's average annual rate increase is just 1.87%.

Fast forward to April 1, 2024, Rocky Mountain Power took a dramatic and calamitous step backwards when it updated the IRP to backslide on Utah's clean energy future. Let's unpack the details here and look at what it means for ...

The early success of the partnership between sonnen and ES Solar highlights the significant potential of home energy storage retrofits and a path forward for solar installers "beyond the "dead-end" of typical solar net-metering [frameworks]," Richetta told Utility Dive in an email.

Energy storage virtual power plant (VPP) provider sonnen and contractor ES Solar have sold 18MWh of energy storage systems in Utah, US, as part of the "Go Back" programme. The programme, enabled by Rocky Mountain Power (RMP), allows Utah homeowners with current solar PV installations to add a grid-interactive smart sonnen battery.

The biennial long-term resource plan calls for a dramatic increase of nearly four times the company's current wind and solar resources to a total of 20,000 megawatts by 2032, in addition to 7,400 megawatts of energy storage by 2029 as PacifiCorp continues to advance on its trajectory toward decarbonization and meet state and federal ...

Fact: Rocky Mountain Power will not contact any customer demanding immediate payment to avoid disconnection of service the same day. Fraudsters may ask you to purchase a prepaid card and tell them the card information over the phone. Fact: Rocky Mountain Power does not ask customers to make payments by purchasing a prepaid card. Customers can ...

In recent years, Rocky Mountain Power has gradually ended its solar net-metering subsidy to shift focus toward replacing solar alone with solar + energy storage with the Wattsmart Battery Program. Through sonnen batteries installed by ES Solar, the companies are building likely the largest network of utility-dispatched smart residential ...

But Rocky Mountain Power only credits solar power customers about 5 cents for the power they send back to the grid. S.B.189 would force Rocky Mountain Power to pay 84% of what it receives for electricity. The bill's sponsor, State Sen. Wayne Harper, R-Taylorsville, said this higher return will provide an incentive for people to go solar.

## Rocky mountain power solar news

Dive Brief: The Utah Public Service Commission last week approved a net metering settlement between Rocky Mountain Power and solar interests. The current policy ends Nov. 15.

Support renewable energy in fixed price, 100 kilowatt-hour blocks of 100% western region wind (73%) and solar (27%) energy and help fund new, community-based renewable energy projects in your state. The cost is \$1.95 per 100-kilowatt-hour block per month.
