receive new posts and support my work. Subscribe. Long story short, we paid \$6,000 to split the cost of the rest of the solar lease with the previous owners so we'd continue to get solar power. We could have just paid a monthly fee but it ...

Last year, more than 90 percent of solar panels had efficiency of at least 20 percent, which is remarkable considering that no residential panels had that level of efficiency as recently as 2011 ...

Your roof isn't getting any bigger, but the amount of electricity that can be produced by solar panels up there has grown by a lot compared to a generation ago. New figures from ...

Solar power from "the dark side" unlocked by a new formula. Companies are moving toward installing more double-sided solar panels, such as this one functioning as the canopy of a Shell gas station in Atlanta, Georgia. A new formula reveals exactly how much more electricity double-sided panels can generate compared to conventional single ...

Researchers have found a way to harvest power from the dark underside of solar panels thanks to a new formula. The efficiency of solar panels is set to be boosted significantly with the harnessing ...

Rooftop solar's dark side. Planet Money. Play . 4.5 million households in the U.S. have solar panels on their homes. Most of those customers are happy with it - their electricity bills have just about disappeared, and it's great for the planet. But thousands and thousands of people are really disappointed with what they've been sold.

Discussion of solar photovoltaic systems, modules, the solar energy business, solar power production, utility-scale, commercial rooftop, residential, off-grid systems and more. Solar photovoltaic technology is one of the great developments of the modern age.

This is not something I learned until September, four months after my husband and I bought this house with a purportedly functional leased solar system in upstate New York, months after logging into a website that inaccurately told us that the panels were working, months after we forked over \$6,000 to prepay the remainder of the 20-year lease ...

Listen to Rooftop solar's dark side by Planet Money on Musixmatch Podcasts. Listen along with enhanced, synced transcriptions and more. Friday, Jul 12, 2024 o 27min. ... The solar panels they initially installed did not generate as much power as promised, and they had to lease outdated panels that also did not significantly reduce their bills

Though solar represented just 3.4% of the nation's electricity generation in 2022, studies show that rooftop solar could eventually meet residential electricity demand in many ...

Across the country, prosecutors are investigating high-pressure sales tactics and misleading financing arrangements. Some customers say they were victims of fraud and forgery. This threatens rooftop solar's impressive momentum. Now, some solar companies are working to repair the industry's reputation.

"We think that having rooftop solar is good for the environment and does save people money. We don't want people deceived, though," says Adam Welle, a lawyer with the Minnesota Attorney General's Office who is pursuing a case against solar financing companies.
