A backup power supply (UPS) provides guaranteed power protection for connected electronics. When the electricity suddenly cuts out or fluctuates beyond acceptable levels, an uninterruptible power supply (UPS) will kick in and offer renewable backup battery power and surge power protection to any connected sensitive equipment.

The UPS-SRBP-2200 is a Select Series Uninterruptible Power Supply (UPS) designed to provide reliable power protection for a wide range of installations. The Select Series UPS models are available in compact form factors when space is at a premium, making them an excellent choice for installations where space is limited.

Select Uninterruptible Power Supply (UPS) - a competitively priced, simulated sine wave battery backup for guaranteeing uptime of equipment in the event of a power outage or anomaly. Designed for both AV and Security applications.

Pairing the optimal UPS and generator backup is a bit like a blind date; compatibility is never guaranteed. To help ensure you find the perfect match - and not an epic clashing of personalities - it is vital to understand the operational characteristics, load interaction and design of these devices. Assess the generator frequency.
