Solar batteries need a battery inverter to be able to power your home. Some solar batteries on the market come with their own built-in (or integrated) battery inverter. If a solar battery doesn't come with a built-in battery inverter, you'll need to install a compatible third-party one. A hybrid inverter could be an option in this situation.

Hybrid solar inverters will beat other products in the context of increasing demands for smart multi-source energy management and efficient distributed energy coordination. As the solar market is under ongoing evolution, the demand for hybrid inverter products is expected to grow continually.
