Inexhaustible and renewable, since it comes from the Sun, solar energy is harnessed using panels and mirrors. It provides heat tapped by mirrors that focus sunlight on a receiver that contains a fluid which reaches temperatures up to 1,000 °C. The heat transforms the fluid in steam which moves a turbine and finally produces electricity.

While this option requires a significant upfront investment, it offers the benefit of immediate ownership of the solar energy system and allows businesses to capture all the financial incentives and savings associated with solar energy. Solar Loans: We offer solar loans specifically designed for businesses looking to finance solar panel ...

Where your home is: This affects the average daily sunlight your roof gets, which helps determine how many panels you need. Typical energy usage: The more electricity your household consumes on average and the higher your current power bills are, the more money you could save by making the switch to solar.
