The cost of a new water heater depends largely on the type and size of the heater. The average national cost for a new water heater installation including a 40- to 50-gallon tank is \$350-\$780. Most homes don't need larger tanks, but they are available -- for a price.

Get ready to optimize your solar water heater's performance and ensure consistent, reliable hot water supply. Proper maintenance of your solar water heater involves thorough inspection of various components, including pipes, fittings, and solar panels, to identify potential leaks and degraded areas such as pipe insulation.

Service your solar hot water system. We hope you're enjoying all the benefits of receiving hot water free from the sun. To maintain the efficiency and reliability of your system, we recommend a Solahart Health Check every 5 years to protect your investment.
